

Saiesha Hyderboni

Hyderabad | +91 8008454717 | saieshahyderabad@gmail.com | [Portfolio](#) | [LinkedIn](#)

Summary

Aspiring Software Engineer with hands-on experience in Python and AI. Skilled in building efficient, maintainable software systems and applying data-driven problem-solving to real-world challenges. Experienced with AWS, SQL, and front-end development, with a strong foundation in algorithms, data structures, and database management. Passionate about developing scalable, user-focused applications and continuously learning emerging technologies in cloud computing and machine learning.

Skills

- **Programming Languages:** Python, SQL, JavaScript, HTML, CSS
- **Frameworks & Libraries:** Node.js, Express.js, React
- **Database Management:** MySQL, MongoDB
- **Development Tools & ML Concepts :** Git, Postman API testing, UI Path Automation, RAG & ML algorithms
- **AI Tools & OS:** Google Antigravity, Claude AI, Windows

Experience

Edugene Technologies

Aug 2023 - Oct 2023

Python programming Intern

- Completed a 3-month internship focused on Python and application development.
- Implemented object-oriented solutions and learned best practices in modular coding.
- Built console-based and small GUI applications, improving understanding of inheritance, exception handling, and collections.
- Collaborated on minor feature implementations and debugging tasks to enhance code efficiency and maintainability

AICTE-Eduskills

Nov 2023 - Jan 2024

Cloud virtual internship

- Gained practical experience in cloud infrastructure and AWS services.
- Designed and deployed sample applications on the cloud, exploring scalability and cost-optimization strategies.
- Learned fundamentals of virtualization, cloud architecture, and serverless computing models.
- Developed hands-on understanding of resource provisioning, automation, and monitoring in a cloud environment.

Course Work(Vector India)

July 2025- Feb26

Mern stack development

- Gained practical experience in Building MERN stack applications.
- Designed and deployed applications with hands-on experience on web technologies including React, Express and Node js.
- Built and deployed few applications such as Hospital management system, E- Commerce etc.

Projects

Hotel Review Analysis for Business Prediction using Deep Learning

- Developed a sentiment analysis model using deep learning to classify hotel reviews and predict business performance.
- Used Python, TensorFlow and NLP libraries for text preprocessing and feature extraction.
- Achieved 90%+ classification accuracy through hyperparameter tuning and model optimization.
- Visualized insights to assist decision-making in marketing and customer engagement.

MoneyScale – Smart Finance Management App

- Built a personal finance management system to track expenses, analyze spending patterns, and provide saving recommendations.
- Implemented a Python backend (Flask) integrated with PostgreSQL for secure and scalable data storage.
- Designed an interactive React.js dashboard with data visualization using Chart.js to display category-wise expenditure insights.

Education

CMR Institute of Technology, Hyderabad

2021 - 2025

B.Tech, Computer Science & Data Science (6.52)

Hyderabad

- **Coursework:** Data Structures and Algorithms, Database Management Systems, Operating Systems, Web Technologies, Machine Learning, Artificial Intelligence, Software Engineering

Certifications

- Cognitive Class by IBM:SQL
- Cognitive Class by IBM:Python, Prompt engineering for chat GPT.
